

Roulettes

## ABOUT TRIPLE CROWN COMPANY

Triple Crown Company was founded in 2009. Its aim was to offer completely new technical and creative solutions in the field of electronic roulette production and innovative networking devices for a large number of slot machines on multiple levels (jackpot) to the international market of games of chance.

This way, with really impressive, totally modern design and technology development of roulette, the players are offered additional playing options and increased winnings. High quality hardware and software guarantee an exceptional reliability of the system which was confirmed by the international certificate, issued by GLL.

We have exhibited our products on several international gaming fairs and thus earned undivided respect of other manufacturers and casino owners who were delighted with our portfolio, and the Triple Crown Roulette won official prizes in the field of industrial design. In every casino, it is the Triple Crown Roulettes that the players are most interested in.

Our highly experienced professionals are the unique guarantee that the new electronic Triple Crown Roulettes, with expanded range of games and gains, will offer new challenges for roulette players in the best possible way.

By constant improvement and innovations, we managed to create a completely new and unique roulette line that is instantly embraced by the players, as a product which offers more. The patent is protected in accordance with The Convention on International Exhibitions, held in Paris, on November 22nd, 1928.

## TRIPLE CROWN ROULETTE

Triple Crown Roulette is a new age roulette game that offers more playing possibilities and a new dimension of entertainment, because:

### IT OFFERS OUR PLAYERS MUCH MORE THAN CLASSIC ROULETTE

While the classic roulette has the expected winning margin of 2.70% of a bet, the Triple Crown Roulette has the margin of 1.93%, with additional benefits for players, such as Mini and Maxi Jackpots.

### IT PROVIDES UNIQUE VISUAL EXPERIENCE

One can simply not stay indifferent after seeing the unique design of Karim Rashid, one of the most prolific industrial designers nowadays.

### IT OFFERS MORE DYNAMIC GAME AND MORE PROFIT TO A CASINO

A bit smaller profit margin is compensated by much faster game, so eventually more money remains for the organiser.

### IT USES SPACE IN OPTIMAL WAY

The possibility of playing on individual play-stations provides full utilization of space and usage convenience. Single play-stations can be placed separately from the central unit. The unlimited number of individual play-stations can be installed on a single central unit.

### IT PROVIDES UNDISPUTED QUALITY

Triple Crown Roulette cover is made of epoxy resins with refined final processing of roulette exterior. Triple Crown Roulette is licensed by GLI.

### IT OFFERS MORE POSSIBILITIES

Besides classic roulette game, Triple Crown Roulette offers a unique combination of roulette game with card games. Triple Crown Game and Triple Crown Poker are playing options available on this roulette only.

### IT IS MODERN

Triple Crown Roulette makes a perfect link between a contemporary lifestyle and classic casinos, as we have known them since the sixties, adding a new, unique visual touch to them.

## THREE GAMES IN ONE ROULETTE

Our roulette offers three playing possibilities:

- 1 TRIPLE CROWN CLASSIC ROULETTE (played on one wheel)
- 2 TRIPLE CROWN GAME (played on three wheels)
- 3 TRIPLE CROWN POKER

### ACTIVE TRIPLE-WHEEL ROULETTE OFFERS MORE!

The idea of the 'TC Project' is aimed at improving typical visual image of every casino, providing complete satisfaction for both players and owners at the same time. We would like to draw your attention to the possibility of playing either a triple-wheel or a classic single-wheel game. The option can be chosen simply by pressing the button on the display. Only TC Roulette gives you a competitive advantage, where in one product, besides the classic roulette, you also get a wider portfolio of technical and playing options.

Winning a "Super 7" bonus is just one of the options from a wide range of opportunities that distinguish Triple Crown Roulette from others. Each time there are three sevens as winning numbers, every player who placed any bet gets bonus in credits.

### SINGLE-WHEEL GAME

This game is the same as on every other classic roulette. For this game only the inner wheel of the central unit is relevant. But, Mini and Maxi Jackpots also apply to the classic roulette game and represent the additional benefits for players.

### TRIPLE-WHEEL GAME

By activating triple-wheel option on play-station monitor, all three wheels are taking active part in the game. The ball stops in one of the pockets of the inner wheel, determining the first winning number, while other two winning numbers are at the second and third wheel, aligned with the first winning number.

Triple Crown roulette gaming system is adaptable to every country's regulations.

## 1 TRIPLE CROWN CLASSIC ROULETTE (single-wheel game)

With a single touch on the screen you can choose between playing the classic roulette and trying your luck on all three active wheels, thus choosing wider playing options.

By choosing the option  (coloured pink in the picture above), Triple Crown is played as every other classic roulette and the bet multiplies by 36 if the ball stops at the chosen number. Winning bonus prizes (Mini and Maxi Jackpots) is also possible on single-wheel game. This is a competitive advantage of our roulette, which provides players an advanced game and increased winnings. The only difference between Mini and Maxi Jackpots in the Triple Crown Game and in the Classic Roulette Game is the number of active wheels, while the same gaming board is used all the time.

TC JACKPOT – CLASSIC ROULETTE		
EVENT	DESCRIPTION	MULTIPLIER
Mini Jackpot	Bets are placed on a number that is winning number on inner and any of two other wheels	bet x 39
Maxi Jackpot	Bets are placed on a number that is the winning number on all three wheels.	bet x 81

The expected profit margin of the casino on single-wheel game is 1.97%

## 2 TRIPLE CROWN GAME (triple-wheel game)

By choosing the option with the three active wheels  (coloured pink in the picture below), Triple Crown Roulette activates the TRIPLE CROWN GAME, that is more interesting and offers more chances of winning.

The game on three active wheels increases the bet three times but with the same combinations placed on classical roulette board, which makes the game more interesting and offers more winning options. By pressing the Triple Crown button  the player starts the triple-wheel game, his bet automatically increases three times, meaning that the basic bet is equally divided on each of the wheels and the player is given bigger chances of winning the Jackpots (the Mini and Maxi TC Jackpots). Jackpot is won by having certain combinations of numbers on two or three wheels, which we call the Triple Crown Game. No extra bets are needed for the Triple Crown Game. With TC Roulette Jackpot players are given the possibility to win more, the game becomes more dynamic, which results in the increase of the profit for the operator, since the game is faster. Triple Crown Game is played on the roulette board.

TC JACKPOT – TRIPLE CROWN GAME		
EVENT	DESCRIPTION	MULTIPLIER
Triple Crown Mini Jackpot	Bets are placed on a number that is the winning number on any two wheels	bet x 81
Triple Crown Maxi Jackpot	Bets are placed on a number that is the winning number on all three wheels.	bet x 300

The expected profit margin of the casino on the triple-wheel game is 1.93%.

## THE COMPARISON OF POTENTIAL OUTCOMES BETWEEN THE CLASSIC ROULETTE AND THE TRIPLE CROWN GAME:

The number on which a player places the bets can be the winning number zero, up to three times.

- If the number on which the bets are placed is not the winning number, the player loses the bet.
- If the number on which the bets are placed is the winning number on only one of three wheels, the bets are multiplied by 36.
- If the number on which the bets are placed is the winning number on any two of three wheels, the player gets MINI JACKPOT, which is:
  - bet x 39 (36 + bonus 3) – when playing on one wheel
  - bet x 81 (2x36 + bonus 9) – when playing on three wheels
- If the number on which the bets are placed is the winning number on all three wheels, the player gets MAXI JACKPOT, which is:
  - bet x 81 (36 + bonus 45) – when playing on one wheel
  - bet x 300 (3x36 + bonus 192) – when playing on three wheels

The example of Mini Jackpot – there is the same winning number on two wheels

The example of Maxi Jackpot – there is the same winning number on all three wheels

## ③ TRIPLE CROWN POKER (triple-wheel game)

The Triple Crown Electronic Roulette is the only one that can combine card games with the classic roulette game.

Triple Crown Poker is a separate game that can be played with a one-wheel game, with a three-wheel game or as a standalone game. Here, you place your bets on a separate part of the game board, which is used only for playing TC POKER. In this case, your bets are not multiplied by 3 as when playing the Triple Crown Game. Only Triple Crown Roulette offers the opportunity of playing roulette and poker at the same time, during one spin. This gives the game a whole new dimension and makes it more attractive. In the case of multiple poker winnings, the highest one counts.

By placing your bets on the Triple Crown Poker board, you automatically win, if one of the following poker combinations occurs:

TRIPLE CROWN POKER PAYTABLE		
EVENT	DESCRIPTION	MULTIPLIER
Triple Crown FLUSH	winning numbers on all three wheels are either black or red	bet x 2
Triple Crown PAIR	the same winning number on any two wheels	bet x 5
Triple Crown STRAIGHT	three consecutive numbers are winning numbers (e.g. 16, 17, 18)	bet x 20
Triple Crown THREE OF A KIND	all three winning numbers are the same (e.g. 15, 15, 15)	bet x 100
Triple Crown TRIPLE ZERO	zero is the winning number on all three wheels	bet x 1.000

The expected profit margin of the casino is 4.52%.

Flush – all winning numbers are either red or black

Pair - there are same two winning numbers on any two wheels

Straight - winning combination is series of numbers (e.g. 6, 7, 8) – 1st wheel 6; 2nd wheel 7; 3rd wheel 8. It is not necessary for the winning numbers to be in ascending or descending order (e.g. 6-8-7; 8-6-7; 7-8-6)

Three of a kind - all three winning numbers are the same

Triple Zero – all three winning numbers are zeros

## TRIPLE CROWN ROULETTE WITH TOP DISPLAYS

### TECHNICAL CHARACTERISTICS

Dimensions	TRIPLE CROWN 8			TRIPLE CROWN 8 WITH TOP DISPLAYS

- Central unit with eight play-stations
- Central unit with six play-stations
- Central unit with five play-stations
- Additional play-station

## TRIPLE CROWN MINIMUM – SERIES MINI

Triple Crown Minimum and Series Mini are new series of Minimum electronic gaming devices of Triple Crown Company. Series Minimum and Mini are designed for those who are used to playing a classic electronic roulette with the central unit having one small wheel. Beside the innovative and distinctive design of Karim Rashid there is also a possibility of choosing how fast the ball will be blown into the wheel. The rules for Triple Crown Mini series roulette are the same as the rules for a classic roulette. With its design and the possibility of playing on individual play-stations Triple Crown Mini and Minimum roulettes provide full utilization of space.

### Triple Crown Mini/Minimum TECHNICAL CHARACTERISTICS

Dimensions	depend on the number of play-stations

## TRIPLE CROWN MINI SERIES COLOUR VARIANTS

Karim Rashid is one of the most prolific designers of his generation, with over 3000 designs in the field of industrial design. Over 300 awards and recognitions as well as his engagement in over 35 countries attest to Karim's legend of design. Karim's creativity and ingenuity enable him to use and combine different ideas, materials and styles in such a way that he opens new horizons for the modern customer.

His award winning designs include democratic objects such as the ubiquitous Garbo waste can and Oh Chair for Umbra, interiors such as the Morimoto restaurant, Philadelphia and Semiramis hotel, Athens and exhibitions for Deutsche Bank and Audi. Karim has collaborated with clients to create democratic design for Method and Dirt Devil, furniture for Artemide and Magis, brand identity for Citibank and Hyundai, high tech products for LaCie and Samsung, and luxury goods for Veuve Clicquot and Swarovski.

Karim's work is featured in 20 permanent collections and he exhibits art in galleries worldwide. Karim is a perennial winner of the Red Dot award, Chicago Athenaeum Good Design award, I.D. Magazine Annual Design Review, IDSA Industrial Design Excellence award. He holds honorary doctorates from the Ontario college of Art & Design and Corcoran College of Art & Design. In 2008, Karim exhibited his biggest retrospective so far at Tomie Ohtake Institute in São Paolo, Brazil. As a curator of New York's Museum of Arts and Design, Karim recently presented his project: "Karim Rashid designs radiators".

Karim is a frequent guest lecturer at universities and conferences globally disseminating the importance of design in everyday life. Karim has been featured in magazines and books including Time, Financial Times, NY Times, Esquire, GQ and countless more. In 2009 Rizzoli released Karim's latest monography Karim Space, featuring 36 of Karim's interior architecture designs. Other books include Karim's guide to living, 'Design Your Self' (Harper Collins, 2006), 'Digipop', a digital exploration of computer graphics (Taschen, 2005), compact portfolio published by Chronicle Books (2004), as well as two monographs titled 'Evolution' (Universe, 2004) and 'I Want to Change the World' (Rizzoli, 2001). In his spare time Karim participates in many fashion projects, as well as numerous spheres of life that shape art and everyday life.

*Karim*
